DETAILED ACTION

This Office action is in response to the communication filed 6-9-05.

Claims 1, 5, 10, 59, 61, 62 and 65-67 are pending in the instant application.

Response to Arguments and Amendments

Withdrawn Rejections

Any rejections not repeated in this Office action are hereby withdrawn.

New Rejections

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 61, 62, 65-67 are rejected under 35 U.S.C. 102(b) as being anticipated by Boehringer Mannheim.

Boehringer Mannheim teaches compositions comprising a pharmaceutically acceptable diluent (water) and a hexameric oligonucleotide consisting of SEQ ID NO: 10, 25, 42, 43 or 45 (see page 1, random hexadeoxyribonucleotides, of Boehringer Mannheim catalogue (1997)).

Art Unit: 1635

Claims 1, 61, 62, 65-67 are rejected under 35 U.S.C. 102(b) as being anticipated by Promega.

Promega teaches compositions comprising a pharmaceutically acceptable diluent (water) and a hexameric oligonucleotide consisting of SEQ ID NO: 10, 25, 42, 43 or 45 (see page 118, random hexadeoxyribonucleotides, of Promega catalogue (1978)).

Claims 1 and 59 are rejected under 35 U.S.C. 102(b) as being anticipated by Brennan.

Brennan (USPN 5,474,796) teaches compositions comprising a pharmaceutically acceptable diluent (water) and the trimeric oligonucleotide consisting of SEQ ID NO: 8 (see figure 1 and col. 3).

Double Patenting

Claims 1, 61, 62, 65-67 are provisionally rejected under the judicially created doctrine of double patenting over claims 1-6 of copending Application No. 09/879,558. This is a provisional double patenting rejection since the conflicting claims have not yet been patented.

The subject matter claimed in the instant application is fully disclosed in the referenced copending application and would be covered by any patent granted on that copending application since the referenced copending application and the instant application are claiming common subject matter, as follows: Claims 1, 61, 62, 65-67 of the instant application are drawn to compositions comprising an oligonucleotide

Art Unit: 1635

consisting of SEQ ID NO: 10, 25, 42, 43 or 45 and a pharmaceutically acceptable carrier. Claims 1-6 of copending Application No. 09/879,558 are drawn to compositions comprising any oligonucleotide of SEQ ID NO: 1-18 and a pharmaceutically acceptable carrier. SEQ ID NOS: 10, 25, 42, 43 or 45 of the instant application correspond to SEQ ID NOS: 2, 5, 14, 15 and 17, respectively, in copending Application No. 09/879,558.

Furthermore, there is no apparent reason why applicant would be prevented from presenting claims corresponding to those of the instant application in the other copending application. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Allowable Subject Matter

Claims 5 and 10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
